## **DETAILED ACTION**

### ***Status of the Claims***

Claims 8-15 are currently pending and under consideration..

### ***Election/Restriction***

1. Applicant's election, without traverse of in Paper No. 4 of Asp B25-insulin as the species, which reads on claims 8-15, is acknowledged.

### ***Specification***

2. The disclosure is objected to because of the following informalities: This application contains an Abstract with a title (e.g. "Prevention of Diabetes"). The title should be deleted. Additionally, the abstract should be revised to properly refer to the subject matter of the presently claimed invention (e.g. deletion of "prevention"; insertion of treating and ameliorating).

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1639

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 8-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,274,549. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent claims the same methods (e.g. treating/ameliorating type I diabetes which same markush of insulin analogs) with the exception that patent claims are directed to a species of administration (e.g. parenteral) within the scope of the presently claimed invention. .
